***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: Claims 1-20 are allowable over prior art references because related references do not disclose every limitation of the claims, in particular deshuffling codes symbols is a deshuffling order corresponding to a shuffling, the deshuffling order being determined considering the demodulation scheme and a structure of a deshuffling memory/storage device, wherein the instant specification defines shuffling as "positioning of relatively significant symbols (i.e., systematic symbols) in relatively reliable bit positions within a modulation symbol and positioning of relatively insignificant symbols (i.e., parity symbols) in relatively unreliable bit positions. Hence, the term "deshuffling" is defined as recovering shuffled symbols to their original positions (see page 6, line 29-page 7, line 4)."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
